Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 September 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Siska et al (US 4946288).

Regarding claim 1, Siska et al discloses in figure 1, a moisture detection device characterized by comprising a mirror whose mirror surface (10) is exposed to a gas to be measured (column 5, lines 40-50); minute projections formed on the mirror surface of said mirror ("roughened surface"; column 5, lines 40-50); cooling means (12) for cooling said mirror; light-emitting means (18) for applying light to the mirror surface; light-receiving means (20) for receiving reflected light of light applied from said light-emitting means to the mirror surface; and means for detecting moisture (24) which is produced on the mirror surface of said mirror which is cooled by said cooling means on the basis of the reflected light received by said light-receiving means (column 6, lines 5-8).

It has been held that even though product-by-process claims are limited by and defined by the process, in this case "the projection is formed by using a photoresist and etching", determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is

unpatentable even though the prior product was made by a different process. *In re Thorpe*, 777 F.2d 695, 698, 277 USPQ 964, 966 (Fed. Cir. 1985).

Regarding claims 2-4, it has been held that the configuration of a device is a matter of choice which a person of ordinary skill in the art would have found obvious absent persuasive evidence that the particular configuration of the claimed, in this case, projections, i.e. pointed tip, or columnar, or semispherical, was significant. *In re Dailey*, 357 F.2d 669, 149 USPQ 47 (CCPA 1966).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Gayst (US 4083224), Ruppert (US 6250134), and Zlochin (US 6926439).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Megann E. Vaughn whose telephone number is 571-272-8927. The examiner can normally be reached on 8 am- 5 pm.
